

Yellow theme — brighter accent

Old accent leaned brownish (hue 85, lower chroma). New accent shifts toward a cleaner gold and bumps lightness + chroma for more pop.

Dark-screen override (:root[data-theme='yellow'] [data-force-theme='dark'])

```
--color-accent: oklch(84% 0.17 95);  
--color-accent-tint: oklch(34% 0.07 95);  
--color-heat-2: oklch(42% 0.10 95);
```

```
--color-heat-3: oklch(60% 0.15 95);  
--color-heat-4: oklch(80% 0.17 95);  
--color-streak: oklch(80% 0.17 95);
```

Same lightness curve, shifted hue (85→95, more yellow, less orange/brown) and raised chroma for a cleaner, brighter gold.
